SUMMARY

A Frontend Web Developer and Computer Science graduate skilled in React.js, TailwindCSS, and Figma, with hands-on experience building responsive, user-friendly websites. Adept at creating wireframes and interactive prototypes in Figma, and translating designs into polished interfaces using modern frontend tools. Eager to contribute fresh ideas, adapt quickly to new tools, and support innovative design solutions that drive product success.

EDUCATION

Bachelor of Science major in Computer Science   **September 2021 – July 2025**

STI Academic Center San Jose Del Monte   **Cumulative GWA: 1.77**

San Jose del Monte City, Bulacan

PROFESSIONAL EXPERIENCE

Philippine Coast Guard - CGWCEISC   **March 2025 - May 2025**

Frontend Developer Intern   **Mandaluyong, 1550 Metro Manila**

- Successfully led the development of a web-based Inventory Management System for the Storage and Accountability Officer of the Philippine Coast Guard – CGWCEISC.
- Designed the UI/UX in Figma, including essential elements such as buttons, modules, modals, and a cohesive color scheme.
- Implemented the design using React.js and TailwindCSS, focusing on reusable components and user based functions.

PROJECTS

PLANTITOTITA

Plant scanning mobile application

- Led the entire UI/UX design of the mobile app using Figma for our third-year Capstone Project.
- Contributed to the app's implementation using Java and XML in Android Studio.
- Gained practical experience in mobile development, debugging, and user interface design.
